

Luigi Guarino has been working at Global Crop Diversity Trust for about 15 years and is now Director of Science. In the 1980s, he was involved in genetic resources collecting, characterization and documentation projects in North Africa, SW Asia and the South Pacific as a consultant for FAO/IBPGR. He was then based successively in IPGRI/Biodiversity International's regional offices for the Mediterranean, for Sub-Saharan Africa and for the Americas. From 2002-2006, he coordinated and managed a regional plant genetic resources network for the Pacific Community. He blogs and tweets on crop diversity conservation around the world.
