

Prof. Dr. Jaime Prohens is full professor of Genetics and Plant Breeding at the Universitat Politècnica de València, Spain. He has been president of the European Association for Research on Plant Breeding (EUCARPIA, 2004-2008). He is Doctor Honoris Causa by the University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca (Romania).

Research

- Genetic resources, diversity, relationships and enhancement of landraces of major and neglected vegetable solanaceous crops.
- Selection and breeding of vegetable solanaceous crops for adaptation to climate change and fruit quality.
- Wide hybridization, introgression breeding with crop wild relatives, development of new experimental populations and broadening of the genetic base of vegetable solanaceous crops.
- Genetics, genomics and gene editing of agronomic traits in solanaceous crops.
